Track Warrant

Special instructions for ***High Fire Danger***; Dampers on locomotives *Inyo* and *Glenbrook* must be in the closed position while locomotives occupy the track in the "Hole" between switch 4 and farthest point North, or anywhere that may have accumulations of **cotton wood fluff**. Additionally locomotives *Inyo* and *Glenbrook* shall not proceed any farther North in the "Hole" than is required to clear switch 4, as to minimize the Locomotives' exposure to fallen and falling **cotton wood fluff**.

All train crew personnel must remain vigilant, and pay special attention to the grounds and track for potential fires.

If you need clarification regarding this warrant, see Kevin Owens or Chris deWitt, in the Restoration Shop.

Sincerely,

Kevin Owens
Restoration Specialist
